<b>Voltage</b>		<b>Power</b>	
(lighting only): 230 V 50 Hz - CE		30 W	
EXTRACTION RATE			
1610 CMH ( cubic meters / hour ) / 950 CFM			
WOOD DATA			
Wood Heating power : 46 kW / 157000 BTU			

- Wood-fired ovens in refractory structure, capable of reaching an internal cooking chamber temperature of 450°C;
- Dome and floor made of prefabricated sectors with refractory material with a high alumina content;
- Thermal insulation in consolidated mineral fibre for high temperatures, with high insulating power, for high operating economy;
- Large and functional front work shelf in 3 cm thick natural granite;
- LP ovens are equipped with an external metal drawer, for collecting embers and ash, positioned under a removable refractory grid in the wood combustion area.
- The LPs are designed for conversion into a gas oven, by removing the refractory grid and installing the optional LP-to-PG series conversion kit;
- Lighting lamp on an external flexible arm for convenient and easy management;
- Bimetallic thermometer with temperature indication in degrees Centigrade and Fahrenheit;
- Differentiated structural warranty on vault and bedplate, 10 and 3 years respectively;
- Oven available in 6 sizes of internal diameter of the cooking chamber, 75, 100, 110, 130, 150, 180, and finishes: Standard, Cupola, Vulcano;
- In the case of Cupola and Vulcano finishes, the exterior cladding is completely customizable depending on chosen material, such as natural stone, glass or metal tiles in various sizes and formats, or more simply in silicone-based washable plaster, available in different colors;
- Or with Standard cladding with multi-layer polychrome painted paneling printed with plaster effect on galvanized sheet metal;
- CE approved.
