ADVANCE PLUS DRYER, SR-11 TP2 E PLUS

KEY FEATURES:

01. GREEN FLOW SYSTEM

To achieve maximum energy savings, we have created an air recirculation system that sends hot expelled air back into the drum. The ADVANCE PLUS range reuses hot air, reducing the maximum drying cycle time and energy consumption.

02. TOTAL FLOW

An innovative and optimised mixed airflow for Advance Plus dryers. The standard axial-radial airflow (mixed flow) is complemented by additional openings to optimised the air circuit and reach maximum efficiency.

03. DOUBLE SKIN

Double skin and a double-glazed door that provide a complete thermal insulation of the machine for improved energy efficiency.

OPL <-> SELF-SERVICE

The machines can be converted from OPL to Selfservice and vice versa from the TP2 control.

- Green flow system: air recirculation system that allows air to be reused for greater energy savings and improved airflow.
- iDry System (Intelligent moisture sensor + temperature control at the drum entrance).
